Map Your Spaces

VIEWING MENU WINDOWS (MOBILE VIEW)

Clicking on a menu item opens a window with more information about that item.

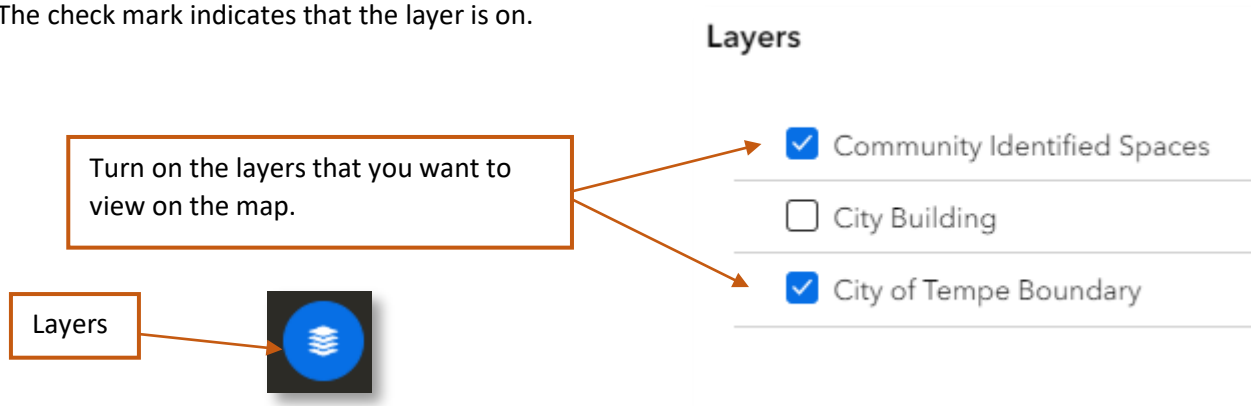

On desktop view, menu windows will open on a side panel.

VIEWING LAYERS

Layers control what is visible on the map. Click the button next to an individual layer to turn it on or off.

The check mark indicates that the layer is on.

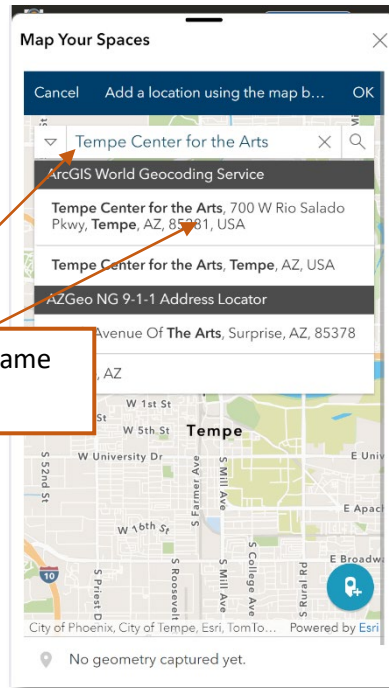

WORKING WITH A MAP IN A MENU WINDOW FORM (MOBILE VIEW)

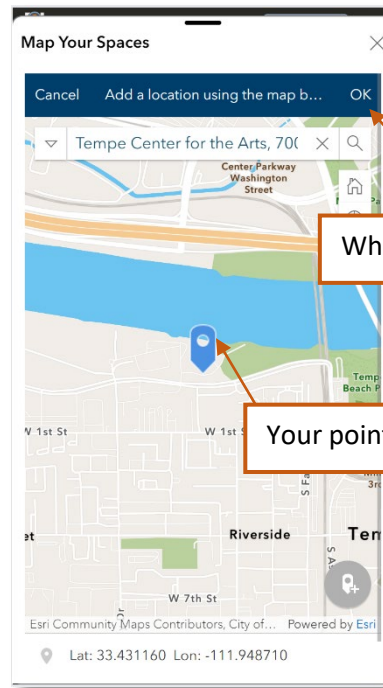

Some menu windows include forms to fill out. Some of the forms ask you to add a location on a small map on the form.

You may add a location to these maps in two different ways:

1. Search for a location and select it.

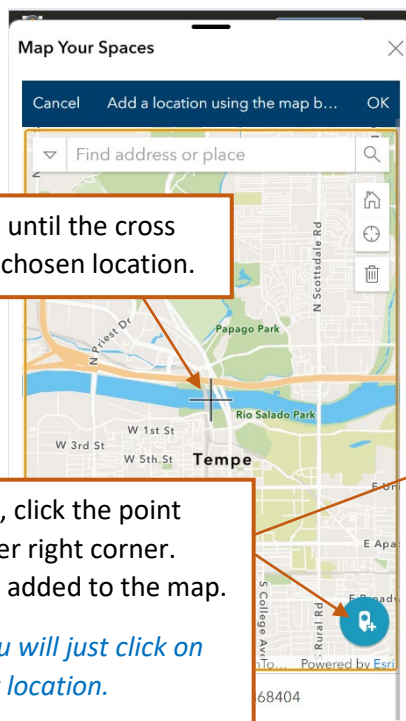

Search for a location by name or address and select it.

When you are done, click OK.

Your pointer will drop onto the map.

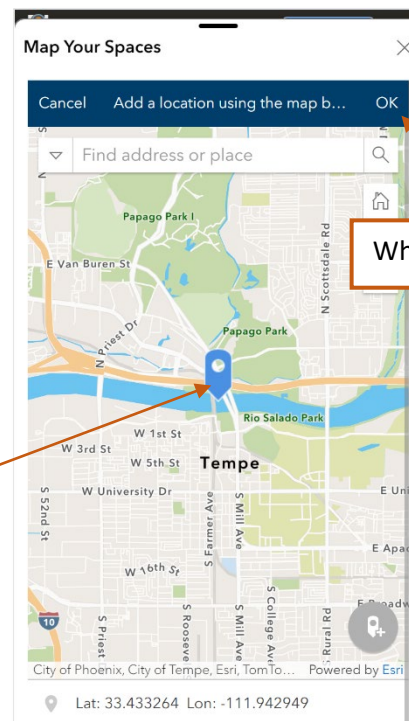

2. Zoom in on the map to your location:

Zoom in on the map until the cross pointer is over your chosen location.

When you are ready, click the point drop icon in the lower right corner. Your location will be added to the map.

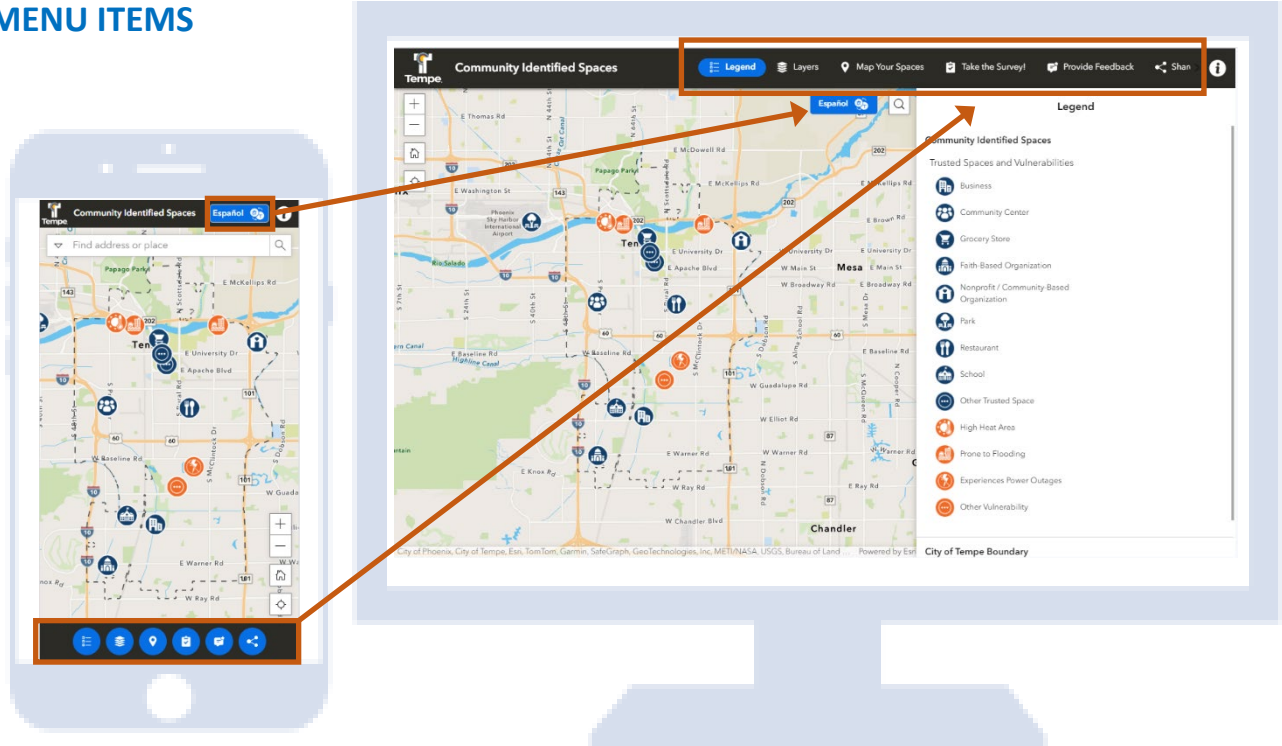

On desktop view, you will just click on the map to add your location.

When you are done, click OK.
